

Identification Solutions

Innovative solutions to help protect your business

Fraud costs UK businesses £130 billion each year, according to a report by the Centre for Counter Fraud Studies (2019). With document fraud a growing concern, it's important to ensure that your printed communications are secure.

From payment systems to mobile ticketing, ID cards to track & trace, we offer an innovative range of solutions to combat forgery.

Tailored solutions using the latest technologies

As the world becomes ever more connected, you can ensure that your documents are protected by the latest secure technology.

Using solutions such as RFID and NFC, we provide smart cards, tickets, labels and tags to clients in diverse markets including public transport, aviation, automotive, manufacturing, logistics, gaming and retail.

Our Services

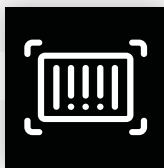

Secure ID

Operating from three certified and highly secure production sites, we offer to the eID sector, eCovers, Inlays and eDatapages for passport and card applications of all types.

Smart Cities

From the first magnetic tickets, to contactless cards and mobile ticketing, we have been part of all technological advances in access control. We are working today to build the cities of tomorrow.

Traceability & Brand Protection

Process optimization, traceability and brand protection have become a constant concern for stakeholders in many sectors. Our expertise in RFID brings tailor-made solutions to their challenges.

Payment

A pioneer in the development of RFID applications dedicated to the banking sector and its suppliers, our innovative payment solutions bring security and an increased user experience.

Secure ID

At the forefront of secure ID protection

The global market for identity documents is booming, especially those with embedded electronic security. According to the latest forecasts, there are 5.3 billion secure documents in the world.

Versatile materials enable these documents to conform to various standards of temperature resistance, thickness, durability and security. Our access to the very latest chip-technology means we can provide the secure ID solution your company needs.

CoreLam

Offers counterfeiting solutions and a 10 year durability that meets government standards for identity contracts.

SPiD

A family of inlays and electronic covers designed for electronic/biometric passport application (ICAO compliant).

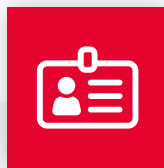

Highly secure production capabilities

Our manufacturing sites have been designed to meet the government's security standards, as well as those required in the identity and banking sectors (NASPO, Visa, Mastercard, CC, EAL4+).

Our e-ID products include;

Passport E-covers

Identification Documents

Secure Documents

Smart Cities

Working today to build tomorrow's smart cities

Modern cities need to enable people to move easily and securely throughout the city. This includes transportation networks, along with a range of venues and public facilities.

Our solutions such as magnetic tickets, contactless tickets, smartcards, and NFC tags not only provide secure ticketing, but also a great experience – being simple to use and access.

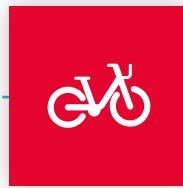

Talk to us about Smart Solutions for;

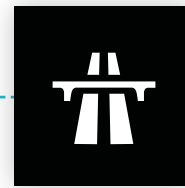

Public Transport

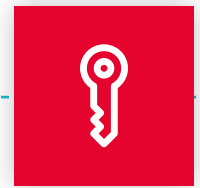

Car Parking
